SUMMARY

As a passionate Front-End Developer, I have over 3 years of experience in building modern web interfaces, optimizing performance, and enhancing user experience. With a keen eye for design and a focus on efficiency, I don't just write code—I create smooth, intuitive, and high-performing digital experiences.

I am always seeking opportunities to contribute to challenging projects where I can deliver innovative solutions and real value.

EDUCATION

Degree	Institute	Board / University	GPA	Year
Bachelor's in Information Technology	Da Nang Architecture University	Vietnam	3.3	2018-2022
Certificate in Back-End Programming (Node.js)	IViettech - Professional Programmer Training Center	Vietnam	9	09-2022 – 12-2022
Certificate in Front-End Programming (React.js)	IViettech - Professional Programmer Training Center	Vietnam	9	12-2021 – 05-2022

EXPERIENCE

- **PNL Digital Conversion Solutions** — *Jan 2024 - Present*
  Front-End Developer — Vietnam
  – Working on e-commerce and ERP projects using Next.js to enhance user experience and streamline business operations.
  – Build and maintain front-end interfaces using Next.js.
  – Develop and integrate APIs to support dynamic application features.
  – Implement scalable and efficient solutions for e-commerce and ERP systems.
  – Collaborate with the team to ensure timely delivery of high-quality features.
  – Manage and guide the team to achieve project goals effectively.
  – Write SEO-optimized code to improve search engine visibility and performance.

  Technologies used: TypeScript, Next.js, RESTful APIs, GitHub.

- **Glory Software Vietnam Company** — *Jun 2023 - Dec 2023*
  Front-End Developer — Vietnam
  – Worked on a financial project for Japan, managing daily cash flow of cash and coin storage machines for retail, banks, and pharmacies.
  – Developed user interfaces using Angular.
  – Built APIs using NestJS.
  – Implemented Kafka microservices to connect different services.
  – Wrote unit tests (UT) and end-to-end (E2E) tests for both front-end and back-end.
  – Worked with PostgreSQL databases.
  – Created Storybook components for UI development.

  Technologies used: TypeScript, Angular, NestJS, Kafka Microservices, Redis, PostgreSQL, GitHub, Docker.

- **FPT Software** — *Jun 2022 - Jan 2023*
  Front-End Developer — Vietnam
  – Worked on LG Chemical PC Asset Management for 6 months as a Front-End Developer.
  – Developed new interfaces for the website.
  – Performed website maintenance and bug fixes.
  – Wrote technical documents (Excel, Jira, etc.).
  – Conducted manual testing of code.
  – Interacted with customers via messaging applications.

  Technologies used: HTML, CSS, JavaScript, Java, Oracle, SVN.

- **BlueOtter** — *Nov 2021 - Apr 2022*
  Front-End Developer — Vietnam
  – Contributed to the restaurant management project for 6 months as a Front-End Developer.
  – Developed new interfaces based on Figma designs.
  – Performed manual testing of code.

- Worked with rebase techniques.
- Optimized front-end code for better performance.

Technologies used: ReactJS, Firebase, Ant Design, Material UI, ESLint, Git, GitLab.

PROJECTS

- **E-Commerce Website** *Sep 2022 - Dec 2022*
  Personal Project **GitHub**
  - Developed an e-commerce website allowing customers to shop for technology products like laptops, phones, tablets, and accessories.
  - Implemented an admin dashboard for managing products, categories, and customers.
  - Integrated user authentication, including login via Facebook and Google, registration, and password recovery.
  - Developed advanced search functionality with multiple filters.
  - Implemented order processing and payment integration using Stripe.
  - Generated revenue statistics and reports.

  Technologies used: ReactJS, NodeJS, MySQL. **Key learnings:** API development with Postman, NodeJS with Sequelize, code optimization, folder structuring best practices.

- **Content Management Website** *Jun 2021 - Sep 2021*
  Architecture University **GitHub**
  - Developed a content management system (CMS) for an architecture university, allowing faculty to create, manage, and publish content.
  - Implemented key features such as user authentication, profile management, and password recovery via email authentication.
  - Designed and built UI components including a dashboard, faculty management, club management, partner management, menu builder, and footer builder.
  - Developed a rich text editor for content creation.

  Technologies used: ReactJS, MySQL. **Key learnings:** ReactJS with Redux, API integration, IIS deployment, code optimization, team collaboration.

TECHNICAL SKILLS

- **Programming Languages**: JavaScript, TypeScript, NodeJS, ReactJS, PHP, C/C++, Python
- **Back-End Technologies**: NodeJS, Express, Sequelize, MySQL, Firebase, SQL Server
- **Front-End Technologies**: HTML5, CSS3, SCSS, JavaScript, ReactJS, Redux, Redux-Toolkit
- **UI Frameworks**: Ant Design, Material UI, Bootstrap
- **Version Control & Tools**: Git, GitHub, GitLab, Postman, Figma
